F o r e w o r d

We take pleasure in presenting to the trade our latest catalogue of Lumbermen's Specialties and Tools, Railroad Appliances and Contractor's Supplies. (*This catalogue supersedes all former issues.*)

How to Order Always give our catalogue numbers and the name in full of each article ordered, also state whether shipment should be made by express or freight and if a particular route is preferred, same should be specified, otherwise we will use our own discretion in making shipment.

Liability We always obtain receipt from Railway Co. showing shipment delivered to them in good condition. We cannot be held responsible for any loss or damage while in transit, but will gladly give our Customers every assistance in an effort to adjust all claims. If shipment is received "short" or in damaged condition have agent note this on Expense Bill before you accept shipment.

Returning Goods If necessary to return goods for any cause whatever, first write us for shipping instructions as we will not accept goods returned to us without our permission.

Terms and Prices Terms are F. O. B. Oshkosh unless otherwise specified. All quotations are for immediate acceptance as prices are subject to change without notice. Accounts overdue are subject to sight draft.

Remittances Remit by bank draft, money order or by registered letter.

Financial Standing Purchasers, whose financial standing has not been established with us, should furnish satisfactory references, remit cash with order or permit goods to be shipped with sight draft attached to bill of lading. In the latter case and in C. O. D. express shipments, sufficient funds should accompany the order to cover all transportation charges.

Oshkosh Manufacturing Company

OSHKOSH DOUBLE EXTENSION LUMBER ROLLER

It can be instantly attached to any door from 5 to 8 feet wide or the end of a gondola. Being made of a very high quality steel tubing it will not sag under any reasonable load even when fully extended. The screw and roller are the same as in the Wood Beam Roller. The main beam is 4 1/2 feet long. The screw has a square thread, which is very strong and will hold securely.

Besides the saving in broken lumber, the time saved will alone pay for this roller in a short time.

- | | |
|--|---------|
| No. 1. With 18 in. wood roller, weight 42 lbs., list each..... | \$15.00 |
| No. 2. With 16 in. iron roller, weight 45 lbs., list each..... | 16.00 |

THE OLD WAY

OUR WAY

ORDER BY NUMBER

CAR DOOR LUMBER ROLLERS

A device which will often pay for itself in a single shipment of lumber is certainly a paying investment. It will reduce the cost of loading and unloading your lumber. Try out our lumber rollers in comparison with the old style home made affairs and you will be surprised at the result. The roller is easily adjusted to any position so that lumber can be handled at any angle desired.

Adjustable Wood Beam Roller

The screw can be extended 16 inches. It has a coarse square thread which is very strong and requires few turns to fasten. The roller is 18 inches long.

- | | | |
|--------|--|---------|
| No. 3. | With 4½ ft. wood beam, weight 40 lbs., each..... | \$ 9.00 |
| No. 4. | With 5 ft. wood beam, weight 42 lbs., each..... | 9.60 |

Adjustable Iron Beam Roller

The beam is made of heavy iron pipe 2 inch diameter. The roller is adjustable to any part of the iron beam. The roller and screw are the same as in the Wood Beam Roller.

- | | | |
|--------|--|---------|
| No. 5. | With 4½ ft. iron beam, weight 36 lbs., each..... | \$10.00 |
| No. 6. | With 5 ft. iron beam, weight 38 lbs., each..... | 10.80 |

End Roller

This roller can be used on the sides of a gondola or in the end door of a box car. Length 14 inches.

- | | | |
|--------|---------------------------------------|---------|
| No. 7. | End roller, weight 12 lbs., each..... | \$ 5.00 |
|--------|---------------------------------------|---------|

Reducing Expenses—That is what our devices are made for and they will do it, by saving time and labor, hence economy in handling lumber and other materials.

ORDER BY NUMBER

TIMBER DOLLIES

Regular

Equipped with heavy cast iron roller $10\frac{1}{2}$ inches long, 6 inches in diameter, and steel axle. The frame is 17×19 inches and made of $2\frac{1}{2}$ inch square hardwood timber. Weight 50 lbs.

No. 8. Regular Timber Dolly, each.....\$ 7.50

Extra Heavy

The roller is $13\frac{1}{2}$ inches long and 7 inches in diameter. The frame is made of 3 inch square hardwood timber and is 20×24 inches in size. Weight 75 lbs.

No. 9. Extra heavy Timber Dolly, each.....\$10.00

Concave Dolly

For railroads, contractors, builders, etc. A very handy device for handling rails, iron, pipe, etc. Can be used both as a dolly and truck.

Heavy cast iron concave roller, $12\frac{1}{2}$ inches long, 7 inches in diameter; steel axle; 20×24 inch frame made of 3 inch square hardwood timber. Weight 60 lbs.

No. 10. Concave Dolly, each.....\$10.00

COMBINED HORSESHOE DOLLY AND TIMBER ROLLER

A light but strong device for handling timber—will save its cost many times over.

The steel frame is 12 inches square and made of $1\frac{1}{2} \times \frac{1}{4}$ inch iron. The roller is 14 inches long by $3\frac{1}{2}$ inches in diameter.

No. 11. Horseshoe Dolly, weight 16 lbs., each.....\$ 5.00

Take advantage of every opportunity to decrease your expenses and increase your business and profit. You can do both with Oshkosh Time Savers.

ORDER BY NUMBER

OSHKOSH PATENT LOAD BINDER

Binds a Load of Lumber, Logs, Hay, Pipe or other large loads **SECURELY** in Three Seconds and Unbinds in One. It Never Jams or Gets Loosened When in Use.

This binder is hand forged from special steel. It has a spread of $22\frac{1}{2}$ inches when open and contracts to $17\frac{1}{2}$ inches, taking up a slack of $5\frac{1}{2}$ inches. Made in two sizes. The regular binder used for binding lumber and other average loads weighs only 8 lbs. The extra heavy binder for binding heavy loads of logs weighs 11 lbs.

Give them a trial. The saving in time and trouble will more than pay for their cost within a few days and they should last a life time.

No. 12. Regular, per dozen, list price.....	\$37.10
No. 13. Extra heavy, per dozen, list price.....	40.00

ORDER BY NUMBER

CAR MOVERS

With a "Double Grip" or "Atlas" mover, one man can easily move the heaviest loaded car. Better than a switch engine, because always at your command. They do the work without a slip, because they get a double grip with two square spurs which grip the outer edge of the rail where it is soft and not on top where it has become case hardened from wear of the car wheels. These spurs can be turned three times, thus always having a sharp edge to grip the track.

Double Grip

No. 14.	Double Grip, weight 15 lbs., each.....	\$ 5.00
No. 15.	Extra handles for Double Grip.....	.75
No. 16.	Extra spurs for Double Grip, per set of two.....	.25
No. 17.	Extra shoes for Double Grip, with spurs and bolt.....	1.50

Atlas

With Rail Guides

No. 18.	Atlas, weight 18 lbs., each.....	\$ 5.00
No. 19.	Extra handles for Atlas.....	.75
No. 20.	Extra spurs for Atlas, per set of two (of Self-hardening Tool Steel).....	.30
No. 21.	Extra shoes for Atlas, with spurs and bolt.....	1.50

OSHKOSH WHITE CEDAR ENGINE PUSH POLES

Fully 40 lbs. lighter in weight and about 30 per cent cheaper in price but more satisfactory results economically from the use of these push poles as compared to hickory, oak or fir.

They are made from young, sound white cedar butt logs, with $1\frac{3}{4} \times 1\frac{1}{4}$ inch iron bands on each end.

No. 22.	9 ft., turned $5\frac{1}{4}$ in. at center, 4 in. ends, weight 30 lbs.....
No. 23.	10 ft., turned $5\frac{3}{4}$ in. at center, $4\frac{1}{2}$ in. ends, weight 37 lbs.....

Other sizes furnished. Can also furnish Washington Fir, Rock Elm or Hard Maple Push Poles.

ORDER BY NUMBER

McMICKEN PATENTED CAR WHEEL HOLDER

THE OLD WAY
Requires Three Men
Twice as Long

THE NEW WAY
Requires One Man
For Same Work

This device will positively provide **easy** access to the journal bearings by holding any car wheel down to the track when jacking up the trucks.

It is made with a steel hook bolted to a hard maple block. The block will reach across two ties and makes a solid foundation for the jack. Therefore, it is not necessary to stop right over a cross tie.

It will save its cost in repairing one hot box.

No. 24. Weight 18 lbs., each.....\$ 3.00

GREAT NORTHERN RAILWAY COMPANY.

Grand Forks, N. D., March 4, 1909.

Oshkosh Manufacturing Co.,
Oshkosh, Wis.

Gentlemen: Referring to yours of February 6th in regard to the McMicken car wheel holders, I beg to say that we have been using these wheel holders for some time and our trainmen are very well satisfied with them. They seem to accomplish what was intended.

Yours very truly,

(Signed) M. NICHOLSON, Supt.

They have one thousand in use.

ORDER BY NUMBER

QUARTERSAWED ROCK MAPLE ROLLERS

For All Purposes.

There are no hearts in these rollers to weaken them—only the best and toughest part of sound, prime logs being used. Turned from air-seasoned quartersawed rock maple squares, they will stand twice the strain of the common rollers and last many times longer.

All rollers are treated with boiled linseed oil and ends are painted before shipping.

THE OLD WAY

See those checks from the heart

Cost More Than
Some Others
But Worth It

THE OSHKOSH WAY

No hearts in the rollers to check.

Size		List Price Each	Size		List Price Each
Diameter Inches	Length		Diameter Inches	Length	
3	3 ft.	\$0.50	7	3 ft.	\$2.90
3	4 ft.	.70	7	4 ft.	3.90

$\frac{5}{8}$	6 $\frac{1}{2}$	1.35
$\frac{3}{4}$	8	1.65

A NEW WIRE ROPE LOADING HOOK

This Hook will get a good hold and still can be pulled out easily when the log is loaded. "It's all in the shape of the hook." This Hook is made of hammered crucible cast steel, with a heavy upset point. It is equipped with a clevis or ring at the top and a ring in the back for pulling away.

We make others sizes to order.

Per Doz.

No. 77. 1 $\frac{1}{8}$ inch octagon, complete \$40.00
 No. 78. 1 $\frac{1}{4}$ inch octagon, complete 50.00

ORDER BY NUMBER

SHORT LINK CHAIN

Size	Average Weight per 100 feet	Proof Col. Steel	B B Crane	B B B Crane
Inches	Pounds	Test Lbs.	Test Lbs.	Test Lbs.
$\frac{1}{4}$	75	1200	1320	1500
$\frac{5}{16}$	110	2500	2750	3200
$\frac{3}{8}$	160	3500	3850	4425
$\frac{7}{16}$	200	4800	5280	6100
$\frac{1}{2}$	250	6200	6820	7850
$\frac{5}{8}$	420	9600	10560	12150
$\frac{3}{4}$	590	13800	12650	14550

Safe working load should be about one-half of proof test.

The breaking strain is about double the proof test.

SPECIAL STEEL LOADING CHAIN

Hand made with extra long swelled welds.

Our special steel loading chain is strongest in the welds, where other chains are the weakest. It will pull stiff and rigid before breaking, thus giving ample warning to those near if considerably over strained. It is strictly short linked with long lapped welds. Every piece is thoroughly tested and is guaranteed against defect of material and workmanship.

DIAMOND STEEL LOADING CHAIN

This chain is hand made from Diamond Special Steel and is the best and strongest for its sizes that American skill can manufacture.

Exact size in inches.....	$\frac{3}{8}$	$\frac{1}{2}$	$\frac{11}{16}$	$\frac{3}{4}$	$\frac{7}{8}$	$\frac{1}{2}$
Tensile strength (pounds).....	6750	8400	10000	11000	14000	18000
Approx. weight per 100 ft. (lbs.).....	85	100	120	170	215	265

TRIDENT STEEL LOADING CHAIN

The welds in this chain are one-third as long as the link. In strength and wearing power it is second only to the Diamond Steel. Trident chain runs $\frac{1}{2}$ inch heavy—for instance, the $\frac{1}{4}$ inch is really $\frac{3}{8}$ inch.

Size in inches (add $\frac{1}{2}$).....	$\frac{1}{4}$	$\frac{3}{8}$	$\frac{1}{2}$
Tensile strength (pounds).....	6600	7800	8800
Weight per 100 ft. (lbs.).....	90	110	130

Please state size, quantity and kind of chain desired and we will quote you prices which we are confident will assist in reducing your chain expense.

IN ORDERING, GIVE SIZE

PATENT SAFETY GRAB HOOK

A hook that saves life as well as time, money and trouble

Closed.

Open.

In loosening or fastening a load of logs this hook will often save many times its cost in a single load because:

A man can **easily** loosen it when standing out of the reach of falling logs.

It does away with breaking the chain because it never fouls.

It cannot get loose except when the shackle is pulled away.

Snow or ice will not interfere with it.

Furnished complete with one large link, safety shackle and bolt.

No. 79.	For $\frac{1}{2}$ inch chain, weight 3 lbs., each	\$ 1.60
No. 80.	For $\frac{3}{4}$ inch chain, weight 4 lbs., each	2.00
No. 81.	For $\frac{5}{8}$ inch chain, weight 6 lbs., each	2.50

ORDER BY NUMBER

HICKORY BOARD RULES

Burnt Figures

These Rules are all marked on one side to measure 12, 14 and 16 feet. In ordering state whether you want opposite side 8, 10 and 18 feet, or 18, 20 and 22 feet. Full length of rules given, including 6 inch handle.

No. 1 Board Rule

No. 1. 3 tier, 3½ foot Inspector's Board Rule, per doz.....\$27.00

Made of the very best selected second-growth white hickory. Has extra heavy brazed heads (steel caps and brass shoulders) and every rule is inspected and tested before being shipped.

No. 2. 3 tier, 3 foot Board Rule, extra heavy brazed head, per doz.....\$25.00

Same style and quality as No. 1, except in length. It is the rule for regular yard work and most commonly used.

No. 2½. 2½ foot Sorting Rule.....\$24.00

Same material as in the No. 2, but this rule is shorter and stiffer.

No. 3 Board Rule

No. 3. 3 tier, 3 foot Board Rule, brazed head, per dozen.....\$23.00

Same as No. 2, except the brass shoulder is half an inch shorter.

No. 4. 3 tier, 3 foot Board Rule, socket steel head, per dozen.....\$21.00

A good, low priced, serviceable Rule.

Oval Head Board Rules

OUR OVAL HEAD is a favorite among lumbermen. In turning lumber with this head the strain is brought on the edge of the rule, saving many broken rules. The oval-shaped top or cap is of best tempered steel, brazed on to an extra heavy brass shoulder.

Can furnish any of above rules with oval head without extra charge. Always state whether square or oval head board rules are wanted.

ORDER BY NUMBER

HICKORY LOG RULES

Burnt Figures

Made with any scale desired. Doyle, Scribner, Decimal and Combined Doyle-Scribner are regular, all other scales are special. Regular rules are marked to scale from 8 to 20 feet, or 12 to 24 feet logs, every two feet. In ordering, always state whether 8 to 20 or 12 to 24, also what scale is wanted.

- No. 14. Square Head Log Rule (any scale), per dozen.....\$27.00
 Figured 48 inches, with 8 inch handle. Full length 4 feet 8 inches.
 No. 15. Square Head Log Rule (any scale), per dozen..... 23.00
 Figured 36 inches, with 6 inch handle. Full length 3½ feet.

- No. 19. Plain Head Log Rule (any scale), per dozen..... 25.00
 Figured 48 inches, with 8 inch handle. Full length 4 feet 8 inches.
 No. 20. Plain Log Rule, no head (any scale), per dozen..... 21.00
 Figured 48 inches, with 8 inch handle. Full length 4 feet 8 inches.

- No. 22. T-Head Log Rule, Wisconsin Pattern (any scale), per dozen..... 27.00
 Figured 48 inches, with 8 inch handle. Full length 4 feet 8 inches.

LUMBERMEN'S PENCIL HOLDER

Nickle Plated.

- No. 86. Complete with 36 inch handle, per dozen\$12.00
 No. 87. Holder only, per dozen..... 10.00

We can furnish special rules, log calipers, lumber gauges, crayons, etc.

ORDER BY NUMBER

OSHKOSH PORTABLE SAW RIG

With Gasoline Engine or Electric Motor

This machine is designed especially for lumber yards in working up the odds and ends, culls, scraps and defective lumber into a marketable and profitable grade which would otherwise result in a loss. It also enables the lumberman to do away with a large assortment of various odd sizes, which would sometimes lay idle for a long time and decrease in quality and value, but with an Oshkosh Portable Saw Rig, all these odd sizes may be manufactured from stock on hand, resulting in a gain in freight, lumber, time and money.

This rig is rapidly gaining the popular favor of all lumbermen, large and small, as it fills a long felt want for a compact, portable mill with self-contained power, which is within the reach of all in price and operates at a very nominal cost.

Any lumberman interested in cutting down the daily losses of his yard and increasing his sales and profits should write us at once for separate catalogue of this rig, which gives full information regarding same.

SEND FOR OUR MACHINERY CATALOG

Eveready

CONTRACTORS' PORTABLE SAW RIG

No contractor's or builder's equipment, large or small, is complete without one or more of these rigs. This machine is the greatest money maker any one in the building business can own. It will do the work of 25 men and the cost of operating is hardly worth mentioning.

From this single machine, it may be turned into the following different machines at a moment's notice:

10 inch Cross Cut Saw
10 inch Rip Saw
12 inch Jig Saw
10 inch Sander

Boring Outfit
6½ inch Dado Head
5 inch Jointer Head
Miter Device

6 inch Emery Wheel

You see, now, you practically have a small mill of your own right on the job, which can be moved just like a tool chest in your every day wagon.

We guarantee this rig absolutely and are willing to sell you one of these machines on the conditions that IF NOT AS REPRESENTED AND SATISFACTORY, SAME MAY BE RETURNED AT OUR EXPENSE.

If you want to fill your contracts cheaper, quicker and with more profit to yourself, it will pay you to send for separate folder on this rig.

OSHKOSH STEEL PEAVIES

Wrought Steel Socket, Clasp and Pick in One Piece

The combined Socket and Pick does away with the shoulder at the end of the socket, allowing the tool to work freely between logs.

It is absolutely impossible for the pick to come out. This peavey is more easily repaired than any other—not necessary to bore the handle, the peculiar shape of the socket holding it firmly in place.

With Round or Duck Bill Hooks.

ORDER BY NUMBER

MALLEABLE SOLID SOCKET PEAVIES

The lightest, strongest, most durable and evenly balanced. The socket is made from the best grade of malleable iron. The hook and pick are made of crucible steel, the pick and socket are set in oil paint, 60,000 lbs. screw pressure, cold—not burnt or driven in. In adaptability to range of work or excellence of finish these peavies are unequalled.

With Round or Duck Bill Hooks.

Specify short or extension Toe Rings

We will send Duck Bill Hooks and Extension Toe Rings unless otherwise specified

For Handles only, see pages 46-47

ORDER BY NUMBER

WROUGHT STEEL CLIP CANT HOOKS

Duck Bill, Round or Chisel Point Hook

The clip is hand forged from hammered crucible steel and is fastened to the handle with heavy bolts secured with screw nuts. This makes an exceptionally light Cant Hook which is preferred in many parts of the country.

Made of Select Maple, 12 inches Long (exclusive of Socket)

No. 612.	Weight 10 lbs., per dozen.....	\$ 1.50
----------	--------------------------------	---------

OSHKOSH CROSS CUT SAW HANDLES

We have devised a Cross Cut Saw Handle that is bound to please because it is strong, easily attached and cheap.

Notice the bolt. It passes through the entire length of the handle, giving it great strength.

Considering annoyance and loss of time due to replacing broken handles, a poor handle is a good deal more expensive.

No. 613.	Per pair, list price.....	\$ 0.50
(50 pair in a case, weighing 135 lbs.)
